(57) Abstract :

ABSTRACT A SYSTEM AND METHOD FOR REGENERATIVE BRAKING IN VEHICLES The present invention relates to a system and method for regenerative braking in vehicles, which helps make transportation more energy efficient and environmentally friendly. It is implemented on the conventional drum brakes which works on the scissor mechanism method. This invention makes easy to install and maintenance because it is simple in design. As less components are used it makes the vehicle less weight and any one make interest on it. Published with Figure 1
