

**Event Description:** Event consists of 2 rounds.

**Round 1:**

For a given circuit the output and some components are given and some components will be missing; with the help of output, they need to identify the missing components.

**Round 2:**

For the qualifiers, a circuit diagram will be displayed, then we will be asking the questions related to circuit etc... whoever answers the questions correctly are given components and those who completes it faster are announced as winners.
